Graham Van Pelt

Software Developer

Hi, I'm Graham, a web-app developer based on beautiful Salt Spring Island in British Columbia. I specialize in creating intuitive, accessible, and satisfying web experiences using React, TypeScript, and modern CSS.

Skills

- React, associated state-managers (e.g., Redux) and meta-frameworks (e.g., Remix, Astro, Next.js)
- Typescript, Accessibility-minded HTML and CSS
- Styling with TailwindCSS, Radix and other UI libraries
- GraphQL APIs (querying, mutating, schema design)
- Collaboration, verbal and written communication

Education

Scrimba | Summer '22 - Spring '23

- Front End Developer Career Path

References

Tipbox.io

- Lead Software Architect - available on request
- Creative Director - available on request

Experience

Frontend Engineer: Tipbox.io | Summer '23 - present

Frontend Development

- Create type-safe UI components, layouts, content views and forms with Typescript
- Collaborate closely with the design team to develop and refine UI flow
- Perform attentive QA, review code, and collaborate using Agile methodologies

React Expertise

- Build seamless, accessible, and animated user experiences in React, utilizing tooling such as:
  - Custom hooks, Redux and React Router for state management and naviagation
  - Chakra UI, CSS Modules, Sass and Framer Motion for styling and animation

API Development

- Contribute to API development for Postgres databases, leveraging tooling such as:
  - Prisma as a database ORM for SQL migrations
  - Apollo GraphQL and Nexus for type-safe Graphql APIs
  - OpenSearch querying for an elastic search feature
